

# THE INTERNATIONAL NETWORK FORMATION OF HETERO-INDUSTRY COOPERATIONS AND ECONOMIC COOPERATIONS IN EAST ASIA

Akihisa Inenaga

## SUMMARY

We call it “the grown-up center in the world” and “the miracle in eastern Asia (East Asia Miracle)” and so on in the world economy in recent years, it is remarkable worldwide as “the Asian dynamism” from the degrees of the rapid Asian area and eastern Asia area economy growth especially. The eastern Asia area to say here is Asia NIES including “Japan (Korea, the Republic of China, Hong Kong, Singapore), ASEAN (Thailand, Malaysia, Indonesian, the Philippines, Brunei), saying areas such as the People’s Republic of China, Vietnam. The development of the economy in these eastern Asia areas is forming remarkably a lot of economic areas and each economic area in them is expanding into the wide area economy area more.

Mainly in concrete “the baht economy area”, particularly Thailand in the South East Asia, Singapore “The grown-up triangle zone economy area”, mainly in that “the both side economy area” in “the South China economy area”, Taiwan and China Fujian is estimated in the growth in the future mainly in Hong Kong and China Kantong Shanghai in the Chinese northeast part “The Chang Jiang river delta economy area”. Moreover, it is economic areas with six pieces of size such as “the annulus the economy area” including this area of the afternoon sun in the China Santong and around the Bou sea and in Korea and my country.

“The economic area in the tropic of Cancer” inside “the both side economy area” in Taiwan and China Fujian and in Okinawa prefecture in my country in these economic areas, moreover, it included this area of the afternoon sun in this “the area of the economy of the tropic of Cancer”, China Santong and around the Bou sea and in Korea and my country “The annulus the economy area”. And, it is forming “the eastern Asia Mediterrane an Sea economy area” from the mutual relation while showing an overlap each other like “the annulus Sea of Japan economy area” to the Sea of Japan coast in China, on the Korean peninsula, in Far Eastern Russia and my country and so on.1)

In this way, the lively economy activity in the eastern Asia area produces a lot of economic areas and moreover, it becomes the economic area which a new area was expanded from their overlap. Then, in the middle of the 21th century, the birth of “the eastern Asia economy cooperation area (the

tentative name)”, also becomes the tide about which it is never impossible to be realized as the newly economic cooperation area as the whole eastern Asia.

These days, as for the world economy, the 2 big economy areas of the European union (European Union; EU) which was started in 1993, and North American free trade agreement (North America Free Trade Agreement; NAFTA) in 1994 is already formed. As for the economy activity, the right, at the world scale, a big influence is expressed in the Asia area, too. Therefore, the economic growth rate of the main country which composes each economic area in eastern Asia about recent years is the place there is one which watches over the eyes and to look forward to the birth of above mentioned “the eastern Asia economy cooperation area (the tentative name)” as a result.

On the other hand, as for the rapid developing of the softnomical society in recent years in Japan, the softnomic of the economy and the industry is remarkable. “The softnomic white paper '90”. According to Corporation Softnomic Economics Study Center, it concentrates the softnomic of the industry in Japan in 4 pieces of classification of making a noble, grobal, convenience and fusing. Today, it ripens economy in my country and it is to be consequential but the softnomic of the industry is giving to the medium and small-sized enterprise in Japan, too, a great influence under the remarkable situation.

Under these influences, the proceed share according to the business scale about all the industry in recent years becomes between 45% and 55%. The share of the medium and small-sized enterprise in the other aspect of the employment exceeds big businesses in the second half of 1960 and in recent years, it reaches 95%. And the medium and small-sized enterprise at the business place share reaches 99%. By hanging survival on the change of the new economic environment is due to the circular high depression, the trade friction in recent years and so on, by the medium and small-sized enterprise in Japan.

It repeats in it, and it rides over the economic morass every time, it puts personal product development and strategy to the body and the business which firmed the management basis is sprung. These medium and small-sized enterprises are a good opportunity arrival and on the personal technical basis to have cultivated after the series loosened. It utilizes the technical power, it develops management strategy and it is wining the result. There is “the area economy promotion by the human cooperation of the difference category of business alternating current group and their wide area cooperation of it” in the one which began to be bathed in the footlights with these business in recent years.

It is convinced that “the wide area cooperation of the difference category of business alternating current group” can become the initiator of the activation of the area business which is based on the

mutual trust to have thought much of the human alternating current with the vicinage various countries in each economic area in eastern Asia in addition to domestic. The difference of the system in the country in the advance place, the lack with legislation degree, the living habitude, the sense of values, the culture and the language and so on is big to the advance tendency to the recent rapid Japanese area business east Asia.

Regrettably few lacks of the trouble and the mutual reliability which is caused by these don't occur. Therefore, one to make mutual trust sure includes alternating current among the areas. It is progressing in the various form such as the sister city, the young man chamber, the young mayor meeting but very little opportunity which the fellow of the business proprietor in the direct area contacts occurs. Therefore, the mutual alternating current among the difference category of business alternating current groups in the above mentioned area will become the very effective and realistic means.

It is lively to be active in Kyushu area which is in the position which is the nearest especially the eastern Asia Mediterranean Sea economy area. It gives the international difference category of business exchange group the activity of my country area business to the case in the taking including these and it tries to view the present situation and a future. On the other hand, the economy the growth of the eastern Asia Mediterranean Sea economy areas such as Taiwan, Korea, China in recent years makes it remarkable and necessary in the new economy cooperation as my country, too. However, when going back to the half century, it is truly unfortunately related.

The alternating current basis by the private base of the business group which spreads out in the area without stopping at merely agreement among the governments is important. It thinks that it is the one where the thing is indispensable for the mutual understanding and the trust to make a basis. As for this point, it promotes international cooperation about the difference category of business exchange steady to one of the important pillars. It thinks that it should promote area economy promotion with the vicinage various countries after making a role share clear in every country in the area.

While expanding the exchange range for a while as the direction of the international difference category of business exchange based on the human exchange in the future, improve a new point of view and the new sense of values and it enriches the important management resources of the one's own company. It expects that there is one of the activation initiator and that it places. Moreover, it is convinced that the international cooperation about the difference category of business exchange can become one of the important bases of the mutual trust.

Of the present situation of this report and the medium and small-sized enterprise in Japan

domestic activity of the difference category of business alternating current being done outside like mentioning above and about the international cooperation of the difference category of business exchange centered on the eastern Asia economy area for upcoming the 21th century. It was considered while visiting a symposium with the university researcher in the area, each organization in the government and the corporation, the business scene in the spot and repeating hearing investigation and so on.

The various countries where purpose of this study composes each economic area in the Asian area which attracts attention as “the grown-up center in the world” in the future of the possibility of the economic cooperation of the main country which composes each economic area in especially and eastern Asia and northern Kyushu area in my country, as the one effective means, it considers about “the international cooperation of the difference category of business exchange”. Concretely, it builds international difference category of business exchange art and science network almost by the researchers in every country.

The possibility of every country difference category of business exchange group, it cooperation and it aims to embody the support of the international economy cooperation, the area economy promotion which is realistic and is also effective which is based on the mutual trust.
